

the Rapax...

NEW WOLLENSAK HIGH-SPEED SHUTTER

The new HIGH-SPEED Rapax Shutter *not only* gives high-speed exposures . . . it gives *accurate* exposures from 1 full second to 1/400 second.★ Developed after years of research in high-speed shutter design, the setting-type Rapax can be used with practically all flash synchronizers.

Featuring a new-type Blade Arrestor device, the Rapax eliminates use of a spring control . . . makes possible extreme speed and exceptionally accurate exposures.

Serving Uncle Sam today, the Rapax will be available after Victory in sizes to fit all popular focal lengths. Available, too, will be other new Wollensak products . . . designed to help *you* make fine pictures.

★ The Rapax shown above provides exposures from 1 full second to 1/200 second and is equipped with a 6 3/8 in. focus Wollensak Series II Velostigmat f4.5.
