

SPOTTING SCOPE

RIFLESCOPE

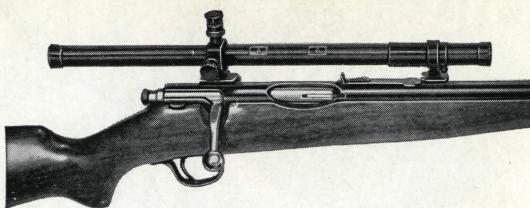

TELESCOPES

FIELD GLASSES

"SEE all there is to See"

WITH WOLLENSAK SCOPES

RIFLESCOPE

THIS four power riflescope makes the target or object appear four times larger or four times closer, thereby making it easier for the shooter to see exactly where he is sighting.

A riflescope is humane in hunting, it permits the vital part of the animal to be sighted, allowing the kill to be made with more accuracy; it promotes steadiness and makes target and small game shooting very sporting and more fascinating and intriguing.

The five lens optical system gives high light transmission and clear view. Each scope is focused at the factory to reveal objects clearly from close-up to infinity without further adjustments.

The rear mount holds the scope in three point suspension and is equipped with micrometer screws for windage and elevation adjustments.

The front mount has a sleeve and spring plunger which engages in a groove to prevent the scope from rotating in the mount and to allow ample recoil to prevent injury to the optics when used on high powered rifles.

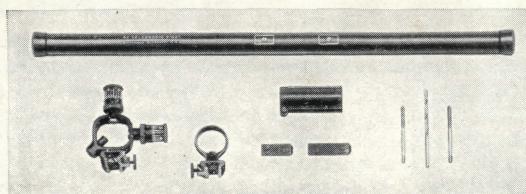

Bases are the same as those that are factory fitted on some rifles. They will also fit rifles that have holes already drilled and tapped for standard bases.

SPECIFICATIONS

Field of view...23' at 100 yards	Overall length.....	15 $\frac{1}{4}$ "
Diameter of objective lens... $\frac{5}{8}$ "	Reticule.....	Cross hair
Outside diameter of tube... $\frac{3}{4}$ "	Eye relief.....	2"
Weight with mounts.....		17 oz.
Price complete with mounts, taps, drill and instructions.....		\$10.00
Riflescope only with cross hair reticle.....		6.50
Mounts with bases, taps and drill.....		6.00
Bases only, with screws.....	pair	1.00
Reticules—Post, Post and Cross hair, cross hair.....	each	1.00

Please specify the make and model rifle when ordering.

OFFSET BASES permit the scope to lie over the side of the barrel instead of on top..... \$1.50

TELESCOPES

TELESCOPES enable us to see farther and see more with greater clarity and without eyestrain. They transport the point of interest to your vision instantly.

Wollensak Telescopes have achromatic optics and produce a wide field of view with crispy sharpness, free from objectionable color fringes and distortion usually found in cheaper telescopes.

The draw tubes are chromium plated for permanence and durability. They are mounted in felt which assures smooth-action, true-fitting, and quick, accurate focusing. Each instrument is supplied with leather case.

SPECIFICATIONS

Power	Diameter of Objective	Length Extended	Length Closed	Field of View at 1000 yds.	Weight	Price
8X	$\frac{7}{8}$ "	9 $\frac{1}{4}$ "	4 $\frac{1}{2}$ "	52 yds.	3 $\frac{1}{2}$ oz.	\$ 3.75
10X	$\frac{7}{8}$ "	14 $\frac{3}{4}$ "	5 $\frac{3}{4}$ "	33 yds.	7 oz.	8.75
15X	1 $\frac{1}{4}$ "	18 $\frac{5}{8}$ "	6 $\frac{1}{2}$ "	25 yds.	12 oz.	11.00
20X	1 $\frac{1}{8}$ "	24 $\frac{3}{8}$ "	8"	21 yds.	17 oz.	14.00
25X	1 $\frac{1}{8}$ "	30 $\frac{3}{8}$ "	9"	17 yds.	26 oz.	20.00
35X	1 $\frac{1}{8}$ "	38 $\frac{1}{2}$ "	10 $\frac{1}{8}$ "	15 yds.	40 oz.	35.00
45X	2 $\frac{1}{4}$ "	46 $\frac{3}{8}$ "	12 $\frac{1}{2}$ "	13 yds.	65 oz.	47.50

CELESTIAL EYEPIECE designed for the 45X Telescope only. Increases magnification to 68X for astronomical work. Price \$9.25

DARK GLASS FILTER for solar observations, to fit all Wollensak Telescopes. Price..... \$2.50

TELESCOPE CLAMP

THIS carefully designed clamp will hold practically all telescopes. It is supplied with removable wood screw for fastening to tree, post, etc. Or it may be used on the camera tripod. It has both elevating and panoramic movements and can be locked in any position. Chromium plated. Price..... \$7.50

SPOTTING SCOPE

A 20 power scope designed for pistol and rifle shooters who are looking for quality at a reasonable price. It will clearly spot a .22 caliber hole in the black at 100 yards, and at this distance it covers a field of 6 $\frac{1}{2}$ feet.

The spotting scope has three draw tubes, chromium plated. Fully extended it measures 24 $\frac{5}{8}$ " and collapsed only 8". The achromatic optical system gives good illumination and a crispy, sharp field of view. The objective lens measures 1 $\frac{7}{16}$ " in diameter.

Besides its usefulness as a spotting scope it is also an excellent observation telescope for hunting, at the summer home, camp and general field use.

Supplied with leather case..... \$14.00
Price with tripod..... 21.50

TELESCOPE TRIPOD

MADE of aluminum alloy and designed to fit practically all hand telescopes and spotting scopes on the market today. It has both panoramic and elevating movements that may be securely locked in any position. The height is adjustable from 9" to 14".

Weight 21 oz.; finish, black lacquer and nickel.
Price with genuine leather case..... \$7.50

POCKESCOPE

A COMPACT telescope designed for pocket use. Not much larger than a jackknife but a real telescope and a leader in its class. Precision lenses, black lacquered barrel and nickel-plated draw tubes. Furnished with genuine leather case.

Power	Length Closed $\frac{1}{16}$ "	Length Extended $\frac{1}{16}$ "	Diameter	Price
Pockescope Jr. 3X	2 $\frac{5}{8}$ "	3 $\frac{5}{8}$ "	$\frac{3}{4}$ "	\$1.00
Pockescope Sr. 6X	3 $\frac{1}{4}$ "	3 $\frac{1}{8}$ "	$\frac{1}{16}$ "	2.00

BINOCULAR

YOU'LL be proud of this modern stream-line Prism binocular anywhere, motoring, yachting to athletic events, etc. Gives brilliant clear image. Permanent morocco grain. Immovable prisms held by steel straps.

Magnification, 8 power. Objective 30 mm. diameter. Exit pupil 3.5 mm. Relative brightness 12.3. Field of view 135 yards at 1000 yards. Weight 18 ozs. Supplied with flexible sole leather case and straps.

Price with leather case \$39.75

COMMANDER

BECAUSE of its large objective lenses, the 4 Power Commander reveals distant objects with remarkable brilliance and clearness. It fits all eyes, no pupillary adjustment necessary. Equipped with center screw focusing and is ideally suited for bird study, theatre, sporting events and general field use.

Diameter objective lens $1\frac{3}{8}$ "; size $2\frac{1}{8}$ " high; $4\frac{1}{16}$ " wide; weight, 7 oz. Price with leather case \$12.50

BIASCOPE

A COMPACT, light weight 6-power field glass for hunting, fishing, hiking, motoring or any activity out of doors. It has a thoroughly corrected achromatic optical system that produces a large, clear view. It has the quickest, one finger focusing device known.

Diameter: objective lens 1"; Size: $3\frac{1}{2}$ " high, $3\frac{3}{4}$ " wide; Weight: $4\frac{1}{2}$ ounces; Price, with leather case \$5.00

ALLSCOPE

THESE ingeniously designed glasses fit the face as comfortably, gracefully and securely as a pair of spectacles. They eliminate the bother of holding the glasses to the eyes when watching races, sporting events or plays. It is handsomely and durably finished, light in weight and supplied with genuine leather case.

Model A Allscope, 2X \$14.00

Model B Allscope, $3\frac{1}{4}$ X \$16.00

THE ADVANTAGES OF MAGNIFIED VISION

FIELD GLASSES, telescopes, all devices which magnify far off objects, fill a tremendously important place in the serious work of the world. But these scientific instruments are considered necessities in many fields of play as well. Most sportsmen, naturalists, yachtsmen, motorists and campers know the delight of using good optical equipment in pursuit of their hobbies. Any lover of the outdoors will find increased enjoyment and real satisfaction in using some form of magnified vision.

TELESCOPES—On land or water, the telescope, because of its relatively high magnification, lends itself to uses where greatest distance vision is required. Objects almost invisible to the naked eye may be seen easily and comfortably from the deck of a boat or from an easy chair

on the veranda of a mountain resort. Under favorable conditions, the higher power instruments may be turned skyward for close-up views of the heavenly bodies.

SPOTTING SCOPES—Rifle and pistol shooters report that the Wollensak Spotting Scope definitely helps to improve their scores because it permits the shooter to see exactly how he is hitting and to correct any fault in sighting. Hunters, too, will find this efficient scope excellent for sighting game as well as other interesting things afield. It is compact and easily carried.

RIFLESCOPE—The difference between the Wollensak Riflescope and open sights stimulates a new interest in shooting. It makes this hobby a wholly new and inter-

esting kind of sport. Even experienced riflemen find a new thrill when they first use a telescopic sight.

FIELD GLASSES—There is tremendous enjoyment in store for you in the fields or woods with a good glass ready for use. For bird study, sporting events, hunting and most outdoor uses, the field glass is favored because of its compact size, and bright, clear field of view.

ALLSCOPES—Avoid the discomfort of holding opera glasses to your eyes in viewing sporting events or at the theatre. These telescopic spectacles slip on and off as easily as eye glasses. Because of their exceptionally wide vision, you may view everything in range, clearly and with amazing freedom from eyestrain.
