**WOLLENSAK**

**20x  
MIRROSCOPE**

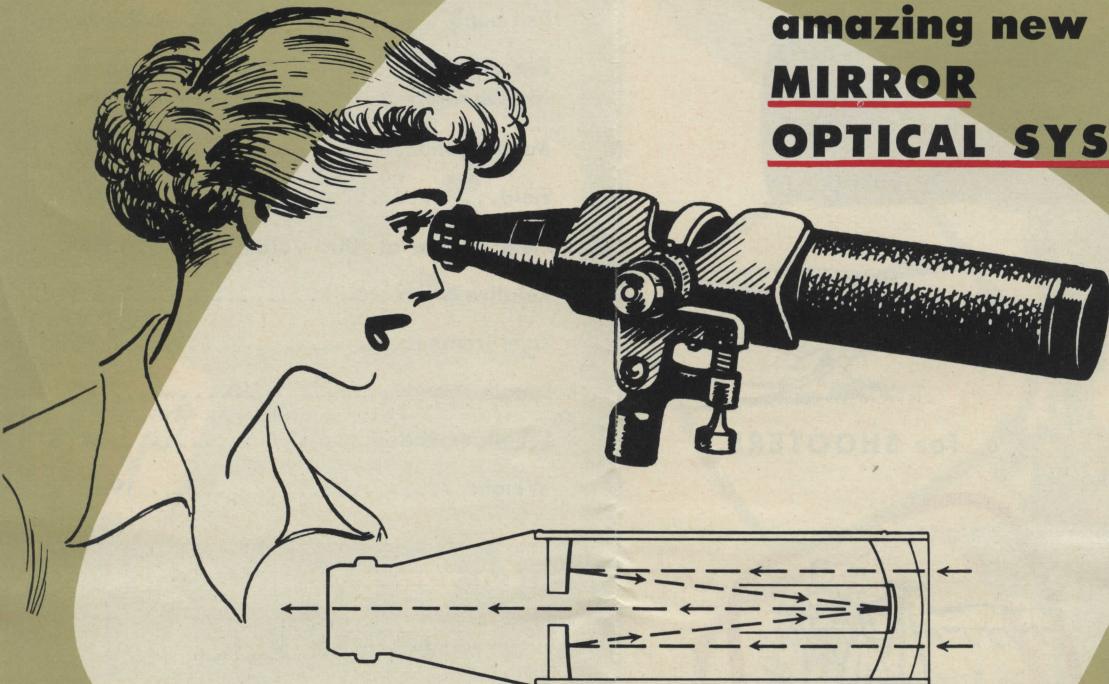

● Brighter, clearer views than  
ever before!

for Shooters, Hobbyists, Hunters and  
Viewing Enthusiasts

# Better...

because of  
amazing new  
**MIRROR**  
**OPTICAL SYSTEM**

Light enters through top quality objective lens,  
strikes Mirror A, is reflected to Mirror B and trans-  
mitted to eyepiece . . . without the loss of light  
common to prism systems. Images are brighter,  
clearer, more sharply detailed.

# Better Every Way

## BRIGHTER VIEWS

Precision-surfaced mirrors transmit full light . . . for brighter, more brilliant views than possible with comparable prism-type scopes.

## CLEARER, SHARPER IMAGES

Finest quality lenses, anti-glare Wocoted, provide full 20-power magnification with superb definition, resolution and contrast. Built-in sun-shade prevents cross-lighting.

## RUGGED CONSTRUCTION

Mirror surfaces are securely mounted in all-metal tube—no prisms to jar out of alignment. Withstands abuse . . . for dependable use.

## EASIER TO HANDLE . . . EASIER TO USE

Mirroscope averages three to four inches shorter than comparable prism-type scopes. It's lighter, more compact . . . easier to handle, more fun to use.

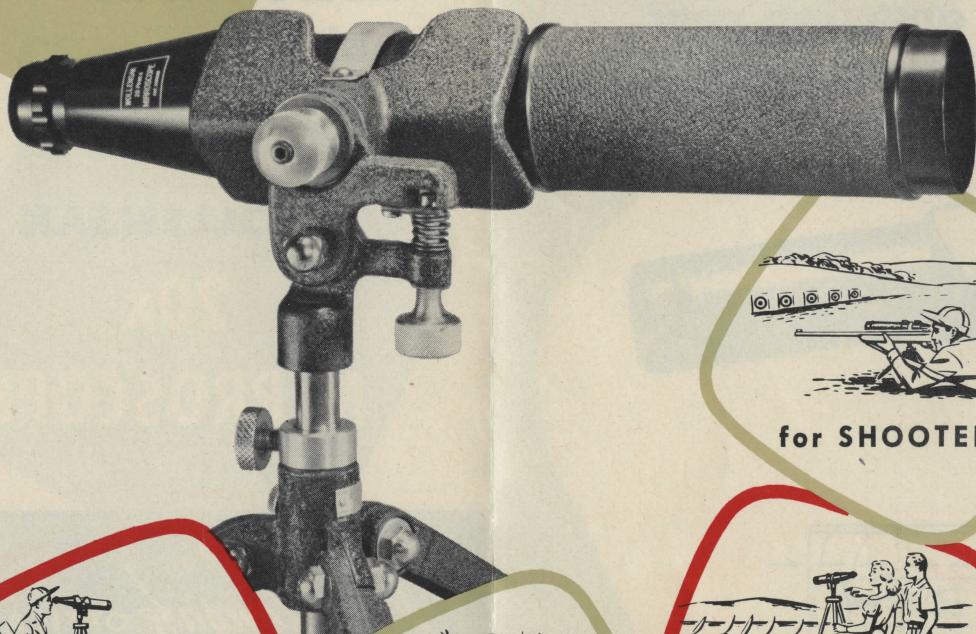

## AMAZING LOW COST

Simplified construction permits Wolensak to price the Mirroscope lower than any scope of equal power and precision.
